Overview

ZWCAD 2026 introduces several new features designed to enhance productivity and streamline workflows.

Capabilities

Parametric Design – Apply geometric and dimensional constraints to 2D shapes, making design modifications easier and faster.

ZWCAD Toolbox – A customizable panel that integrates essential tools for layers, dimensions, and selections, improving accessibility.

Smart Plot – Automatically detects drawing frames, matches them to appropriate paper sizes, and enables batch plotting across multiple files.

Chain Select – Select connected loose lines in batches for higher efficiency.

Text Dodge – Auto-adjust dimension text positions for better readability in dense drawings.

Find Panel – Quickly locate content across drawings with a search panel.

Clickable Command Line – Access commands faster to speed up workflow.

Smart Match – Identify identical shapes and support batch editing to improve drawing efficiency.

Similar Search – Search for similar blocks in local files based on a specified graphic, simplifying reuse of historical block data.

Smart Dimension – Automatically recognize object types and generate corresponding dimensions.
